

AK-225MFC Kit

WATER-COOLED

Accessory Kit

10/2011 WC0110

- 24, 24-90 heads – 180 amp DC, 130 amp AC at 100% duty cycle
- 9-70, 9-90, 9P heads – 200 amp DC, 140 amp AC at 100% duty cycle
- 1726, 1726P heads – 225 amp DC, 160 amp AC at 100% duty cycle

The configurable option for excellent TIG performance!

Weldcraft's AK-225MFC (Modular Flex Complete) Kit converts a single WP-225 water-cooled TIG torch package into 5 additional torch configurations. This highly adaptable torch meets the demands of multiple TIG welding applications, and eliminates the need to purchase, stock or changeover additional torches.

All-in-one kit features collets, collet bodies, nozzles, torch heads and more to simplify inventory and storage, and complements available WP-225 torch packages.

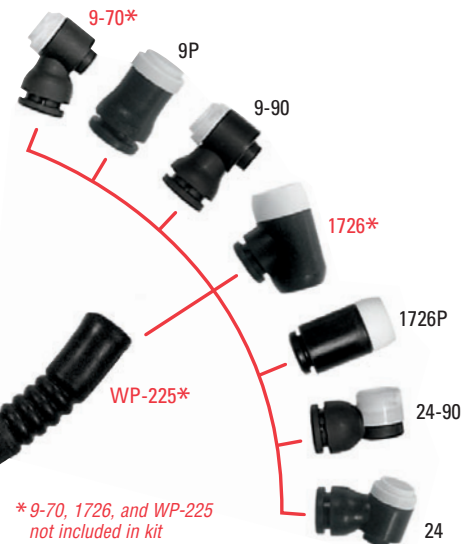

Efficient water-cooling capacity minimizes overheating to reduce costly and unnecessary downtime, and helps extend consumable life.

Multiple torch-head options provide good joint access, even in the most difficult-to-reach areas, and allow for welding at various angles.

2% Ceriated tungsten provides excellent arc starting for a range of amperage settings, and performs well for AC or DC processes. (1/16", 3/32" and 1/8" diameters included.)

Multiple Configurations

AK-225MFC Kit Includes:

- 1/16", 3/32" 1/8" Ceriated tungsten electrodes

For 160-amp set-up

- 24 (60° torch head)
- 24-90 (90° torch head)
- 53N20 wrench
- 1/16", 3/32" collet and collet body
- #5, #6 lava nozzles

For 200-amp set-up

- 9-90 (90° torch head)
- 9P (180° torch head)
- 1/16", 3/32", 1/8" collet and collet body
- #5, #6, #7 alumina nozzles
- Back caps – short, medium and long

For 225-amp set-up

- 1726P (180° torch head)
- 1/16", 3/32", 1/8" collet and collet body
- #5, #6, #8 alumina nozzles
- Back caps – short, medium and long
